International Association of Oil and Gas Producers

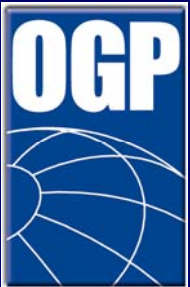

International Association of Oil & Gas Producers

- Formed in 1974 to develop effective communications between the upstream industry and international regulators
- **Members**
 - Publicly traded, private & state oil & gas companies
 - National & regional associations
 - Major oil/gas field service companies
- **Members produce more than half of the world's oil and over one third of its gas**
- **Offices in London and Brussels**

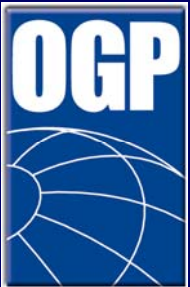

Mission

- To represent the interests of the global upstream industry to international regulatory and legislative bodies
- To liaise with other industry associations globally and provide a forum for sharing experience, debating emerging issues and establishing common ground to promote cooperation, consistency and effectiveness
- To facilitate continual improvement in HSE, CSR, engineering and operations

Best practices

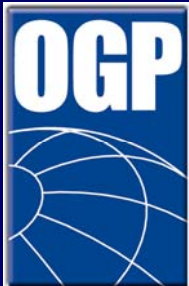

- Benchmarking, including maintaining the industry safety, environmental and health performance databases
- Sharing and learning from best practices, through workshops, publications, committees, task forces, *etc*
- Leveraging OGP practices in discussions with authorities
- Networking with industry peers
