

**International Standards
Workshop, Kuala Lumpur,
23-24 February 2009**

Introduction to Workshop

**Neil Reeve, Shell,
Chair OGP Standards Committee**

Greetings from OGP's Executive Director

- On behalf of OGP, the International Association of Oil & Gas Producers, welcome to this Standards event in Kuala Lumpur.
- As an organisation, we are honoured to be here and to share this important event with Petronas, Department of Standards Malaysia, and SIRIM.
- My one regret is that I couldn't join you in person.
- Malaysia is one of the significant regions in the global oil & gas industry.
- OGP is a global association that represents the upstream industry to international regulators and legislative bodies.

Mr. Charles Bowen

Greetings cont...

- Just as important is the part OGP plays in facilitating continuous improvement in the areas of Health Safety and Environment, social responsibility, engineering and operations.
- This workshop is a significant step in bringing the benefits of OGP's International Standards work to Malaysia - and giving OGP the opportunity to learn from you.
- One of the things you will be hearing from us is the OGP Standard Committee's overriding aim to achieve:

Global Standards Used Locally Worldwide

- It is a phrase you will find hard to avoid in the next two days. But it bears repeating because global standards can have a major, beneficial impact on your business – not only in the areas of HSE, CSR, engineering and production but on your bottom line as well.
- With that in mind, I wish you all a very fruitful and enjoyable workshop.

Charles Bowen

Objectives of workshop

- **Provide an understanding of international standardisation activities**
- **Review and discuss the international and national standardisation work**
- **Explore experiences of adopting such standards for the oil & gas sector**
- **Understand challenges facing harmonisation of company and local standards with International Standards.**

Aims of the workshop

- 
- A decorative graphic on the left side of the slide features a light blue circular shape with several curved lines radiating from its right edge, resembling a stylized sun or a signal. The lines extend across the slide, partially overlapping the text.
- **Introduce OGP's Standards work to Malaysia**
 - **Explain International Standards – their development and use**
 - **Improve understanding of how 'standards' fit into a regulator's safety regime**
 - **Explain how Malaysian Standards fit into International Standards.**
 - **Provide an overview industry's experience.**
 - **Identify what Malaysia can offer the International Standards development process**
 - **Identify how the operators can contribute.**

Key benefits

- Provide an overview of ISO process
- Learn about ISO TC67 work
- Highlight importance and benefits
- Explore experiences of others and how Malaysia can influence these standards.
- Clear picture on the benefits of ISO in a goal setting regulatory regime
- Identify difficulties / suggest effective solutions
- Define Malaysian oil & gas sector needs
- Q&A session with professionals.

Thank you!

OGP

- **Neil Reeve**
