

## **Bucharest workshop 2007 breakout session**

**Motto: What should we as an industry do to facilitate a smooth transition to European standards?**

- 1) What are the challenges that Romanian O&G industry faces with respect to implement EN standards?**
- 2) What are the options open to Romania to make a change in its standards work?**
- 3) What needs to happen to achieve effective Romanian participation in important European & International Standards development for the O&G industry?**
- 4) What are the links between Romanian regulations and standards and do the new EN/ISO standards impact this?**
- 5) Does the current CEN/TC12 (ISO/TC67) standards & program meet the Romanian needs? If not, what is missing or should be different?**
- 6) How does Romanian industry identify the necessary expertise to ensure effective input into the future development of CEN/TC12 (ISO/TC67) standards?**
