

**GLOBAL STANDARDS USED LOCALLY WORLDWIDE  
ISO TC 67 (rev 17)**

*Alain LOPPINET*

CEN TC12

**LIST OF ISO TC67 STANDARDS  
With the adoption in API, CEN and various other  
Standards Developing Organisations**

**On the 31<sup>st</sup> of December 2009**

# GLOBAL STANDARDS USED LOCALLY WORLDWIDE

## ISO TC 67 (rev 17)

### PRESENTATION OF THE LIST

The vision of the Petroleum, Petrochemical and Natural Gas Industries standards effort in ISO Technical Committee 67 is:

#### **GLOBAL STANDARDS USED LOCALLY WORLDWIDE**

This vision is also reflected by OGP Report No. 362 Position paper on the development and use of international standards. The purpose of the following list is to show where we are in this vision at the time of issue of this OGP Report. The report will be revised from time to time to show the further steps of the standards development and adoption process.

#### ISO TC67 column:

The basis of the document is the complete list of ISO TC 67 published standards including joint standards developed together with ISO TC 60 SC2, ISO TC 115 SC3, ISO TC 118 SC1, ISO TC 153 SC1 & ISO TC 192.

#### API column:

In this column are indicated the API standards which have already been adopted back from the ISO standards and for which, in the title, you find both references, the API one with the number of the edition and the ISO one. You see that in the API catalogue both indications are mentioned. You may also see in that list for some of them the mention "ISO modified", which has been added; it indicates that some technical differences from the ISO document were included.

Also note that all national adoptions are, by definition, American National Standards (ANSI). API indicated also in the list some ISO standards for which a **National Adoption is under committee consideration**.

*Three of the indicated documents in the API column are issued by another SDO (NACE) but concerns our activity, fit with our vision and are adopted in CEN TC12.*

*Note that in the API document the main body of the standard is identical to the ISO one (except when the mention modified is added), but regional(s) annexe(s) is (are) added as well as annex for the monogram programme when it applies.*

#### BRAZIL column:

In addition to the adopted back documents, Brazil indicates some for which the basic text for adoption is under preparation.

#### CEN column:

It is important to note that the EN standards are also published as national standards in all the 30 European countries members of CEN within the 6-month of the publication as EN, which is a further step in our vision.

The standards mentioned are technically identical to the corresponding ISO one (these standards are numbered EN ISO XXXXX); they were accepted in Europe either through the parallel vote procedure or by Unique Acceptance Procedure within the Vienna Agreement between CEN and ISO (ISO leader). All the documents are part of CEN TC12 work programme *except two which depend upon CEN TC 69 and two upon ECISS TC 110*. Some of them (developed by ISO TC 67 SC2) have a different number in ISO and in CEN because, if the technical content is identical, their scope in Europe

# GLOBAL STANDARDS USED LOCALLY WORLDWIDE

## ISO TC 67 (rev 17)

excludes the gas infrastructure industries; they nevertheless have in their title the reference to the ISO initial standards with the mention :( modified).

*The standards which are issued by CEN TC69 and by ECISS TC110 concern our activity, fit with our vision and in addition one of them is also adopted back and one under consideration in API.*

*Note that in the EN document the main body of the standard is identical to the ISO one, with a leaf page added on the ISO standard.*

### CHINA column:

The only matter to be raised is that the Chinese number of the ISO adopted standard is different from the ISO one.

### GSO column:

This column concerns an additional regional group of non-European countries which have adopted our vision and adopting back (identical or modified) our ISO TC67 standards. GSO is the Gulf Standardization Organization for the Cooperation Council for the Arab States of the Gulf. GSO currently includes 7 countries: Bahrain, Kuwait , Oman , Qatar , Saudi Arabia , United Arab Emirates and Yemen (recently joined GSO). Once a standard is adopted by GSO, it is then automatically adopted back in the member countries of the Organization, as it is the case in CEN.

### EASC columns:

Russia and Ukraine have added to the list of the adopted back standards, the plans for adoption of other ISO standards **(in green colour)**. Some delays in this adoption may be noted.
